

Place Value: 4-Digit Numbers

Remember that using a model or place-value chart can help you understand the value of each digit in a number.

Thousands	Hundreds	Tens	Ones
2,	4	3	7

$$\begin{array}{r} \text{2 thousands} \\ 2,000 \end{array} + \begin{array}{r} \text{4 hundreds} \\ 400 \end{array} + \begin{array}{r} \text{3 tens} \\ 30 \end{array} + \begin{array}{r} \text{7 ones} \\ 7 \end{array}$$

You write it: 2,437.

You read it: "two thousand, four hundred thirty-seven."

Write in standard form.

1. $3,000 + 500 + 70 + 9$ _____

2. $8,000 + 400 + 3$ _____

3. $1,000 + 200 + 80 + 6$ _____

4. $7,000 + 900 + 10$ _____

5. two thousand, one hundred thirty-eight

6. five thousand, eight hundred seven

7. nine thousand, fifty

8. four thousand, two
