

TALLER #1 CONVERSIÓN CON DIVISIÓN

Resuelve los siguientes ejercicios aplicando el proceso de conversión con la división

- 1) 131072b -> B
- 2) 1389568 TB -> PB
- 3) 7340032 KB -> MB
- 4) 1011357696 B -> KB
- 5) 102400 MB -> GB

1)

The diagram shows a staircase of squares starting from the top-left and going down to the bottom-right. The squares are arranged in a 6x6 grid. A thick black L-shaped line is drawn at the intersection of the 5th row and 5th column, extending to the right and down.

2)

The diagram consists of two main parts. On the left, there is a staircase-like arrangement of squares. The top row has 7 squares, the second row has 6 squares starting from the second column, the third row has 5 squares starting from the third column, the fourth row has 4 squares starting from the fourth column, the fifth row has 3 squares starting from the fifth column, the sixth row has 2 squares starting from the sixth column, and the seventh row has 1 square in the seventh column. On the right, there is a grid of squares. The top row has 4 squares, and the bottom row has 5 squares. A thick black L-shaped line separates the staircase from the grid, starting from the top right of the staircase and extending horizontally to the right, then turning vertically downwards.

3)

The diagram consists of two main parts. On the left, there is a staircase-like arrangement of squares. The top row has 7 squares, the second row has 6, the third has 5, the fourth has 4, the fifth has 3, the sixth has 2, and the seventh has 1. On the right, there is a grid of squares arranged in 2 rows of 4 squares each. A thick black L-shaped line separates the staircase from the grid.

4)

The diagram shows a 10x10 grid. A thick black L-shaped line is drawn, separating the top-left 4x4 area from the rest of the grid. The top-left 4x4 area contains a 4x4 grid of squares. The rest of the grid contains a 6x6 grid of squares.

5)
