

Área de figuras planas

1. Calcula el área de cada figura plana

$$A = \frac{D \times d}{2}$$

$$A = \frac{\text{cm} \times \text{cm}}{2}$$

$$A = \frac{\text{cm}^2}{2}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

$$A = \frac{(\text{cm} + \text{cm}) \times \text{cm}}{2}$$

$$A = \frac{\text{cm} \times \text{cm}}{2}$$

$$A = \frac{\text{cm}^2}{2}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

$$A = \frac{B + b}{2} \times h$$

2. Escribe el área de cada figura.

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

$$A = \underline{\hspace{1cm}} \text{m}^2$$
