

Months of the Year Song -
by Peter Weatherall

If you can't remember
The months of the year
From January to December
I got a little song here

January February March April
May June and July
August September
October November
And don't forget December

Well, there are 365
Days in a year
52 weeks but only 12 months
In this little song here

January February March April
May June and July
August September
October November
And don't forget December

Now if you've got a calendar
It really pays to check it out
Turn the pages and you'll see
What this song is all about

January February March April
May June and July
August September
October November
And don't forget December

If you find you still forget
The months of the year
Don't you worry and don't you fret (אל תדאג)
Sing my little song here

January February March April
May June and July
August September
October November
And don't forget December
