IF / UNLESS

NOW LET'S GO TO PAGES 50 AND READ "FACES OF THE FUTURE"

5 READING • Future humans I can match visual information to a text.

THINK! How are you different from your parents and grandparents? Will people in the future be different? Why?

FACES OF THE FUTURE

Humans have **adapted** and changed through the ages and, unless a catastrophe **destroys** the Earth, we'll probably survive and continue to change. Scientists are already saying that children born now might live until they're 150. Further into the future, perhaps people won't die but simply buy new body parts as they get older!

What other changes are possible in the years ahead?

1 Homo Informaticus If we continue to use computers and screens more and more, our eyes and brains will probably get bigger in order to **process** more information.

2 Neo-humans If there's a terrible war or an epidemic, survivors might leave the cities and live in caves. They'll become stronger, hairier and more agile.

3 Homo Perfectus If scientists **manipulate** human genes, will some people pay to have children who are better looking, healthier and more intelligent than 'normal' humans?

4 Cyborgs Soldiers of the future might be part human, part machine, with super-strong body parts, auto-zoom eyes and a brain connected by Wi-Fi to super computers.

5 Space humans If Earth gets too crowded, humans will **colonize** other planets. If they adapt to a different atmosphere and gravity on another planet, they won't look the same as humans on Earth.

Which possibilities do you think are most likely?

Comments
