

ACTIVIDAD PARA CASA

Resuelve las operaciones combinadas.

a) $8 \times (13 + 15) : 2$

Diagram illustrating the order of operations for the expression $8 \times (13 + 15) : 2$. The expression is broken down into three steps:

- Calculate $13 + 15$ (indicated by a blue arrow from the parentheses to a box).
- Calculate $8 \times$ (indicated by a blue arrow from 8 to a box).
- Calculate the final result (indicated by a blue arrow from the previous box to a final box).

b) $12 + 92 : 4 - 16 + 76 : 2$

Diagram illustrating the order of operations for the expression $12 + 92 : 4 - 16 + 76 : 2$. The expression is broken down into four steps:

- Calculate $92 : 4$ (indicated by a blue arrow from the division to a box).
- Calculate $76 : 2$ (indicated by a blue arrow from the division to a box).
- Calculate $12 +$ (indicated by a blue arrow from 12 to a box).
- Calculate the final result (indicated by a blue arrow from the previous box to a final box).

c) $(9 \times 4 : 6) \times 3 - 10 + (64 : 4)$

d) $123 \times 2 : 3 + 52 \times 2$
