Foodless Food!

I think that the food of the future will be different. People won't eat any food at all. They will just take a few pills during the day. People won't go to the supermarket, they won't cook and they won't do the washing-up. This means there will be more free time for everybody. People will also be healthy because the pills will be full of vitamins. Unfortunately, I think that food pills will bring some problems, too. People won't enjoy nice food. There will be no more family dinners or outdoor barbecues. Can you imagine a Christmas dinner with pills?

There will be no dessert, or popcorn to eat in front of the TV. People won't be happy. They will have more free time but they won't have many places to go with their friends. There won't be any fast food restaurants, cafés or even food festivals. A foodless future sounds really boring.

1. People _____ eat food.
2. They _____ have more free time.
3. They _____ be healthy.
4. They _____ go to restaurants.
5. They _____ take pills.
