After watching the video, in groups, write each characteristic under its proper heading. Another option: enlarge the grill, then ss can cut out the characteristics and place them on the correct squares.

GEOSPHERE	CRUST	MANTLE	CORE

1

Ultrahigh temperature

Rocks, magma, minerals and sand

Seven tectonic plates

3-50 km

6,730 km

Continents and the bottoms of the oceans

2,900 km

The outermost layer

The innermost layer

Three concentric layers

82% of the Earth volume

Magma

3,500 km
