- b) Travis has been riding motor bikes since he was ten years old. _____

- c) Travis had to use a wheelchair because he injured his head. _____
d) Travis has good equipment. _____

8) Read. Write *T* for True or *F* for False.

King Tut's Tomb

Egypt is full of really exciting and ancient discoveries, but the most famous is the tomb of King Tutankhamun (King Tut). Howard Carter found King Tut's tomb in 1922. Inside the tomb, Carter found hundreds of gold objects, over 3,000 treasures, and King Tut's mummy. King Tut was buried more than 3,000 years ago, but his DNA was preserved. He died when he was very young, but the cause of his death is not known. In 1968, his mummy was analyzed by scientists, who found broken bones in Tut's skull. A CT scan of Tut's mummy in 2006 showed that he broke his leg before he died. A DNA test showed that he had malaria. History's a mystery!

- _____ King Tut's mummy was found in 1922.
_____ A DNA test showed that King Tut had a broken leg.
_____ The cause of King Tut's death is not known.
_____ Archaeologists found hundreds of gold objects in King Tut's tomb.
