

Which linear equation is written in standard form?

$$-2x + 3y = 4$$

$$\frac{2}{3}x + 6y = 2$$

$$4x + 5y = -9$$

$$2y = 4x + 1$$

Write $\frac{2}{3}y = 3x - 1$ in standard form. Identify A , B , and C .

Drag and drop the answers to correctly complete the sentence.

Standard form is with $A =$, $B =$, and $C =$.
