

CALCULAR ÁREAS USANDO cm^2 Y m^2

Recuerda:

Un cuadrado de lado 1 cm, corresponde a 1 centímetro cuadrado:

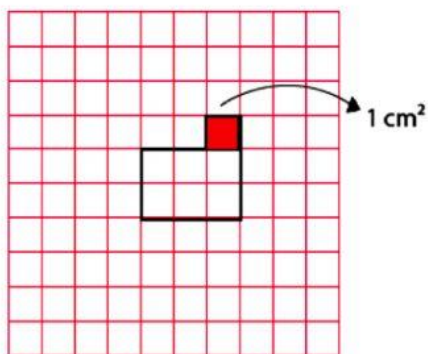

Y un cuadrado de lado 1 m, corresponde a 1 metro cuadrado:

Se usan diferentes unidades de medidas según el tamaño de la superficie: mm^2 , cm^2 , m^2 , km^2 , etc.

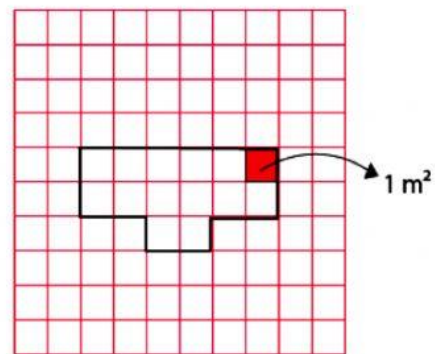

1. Calcula el área de cada figura.

1)

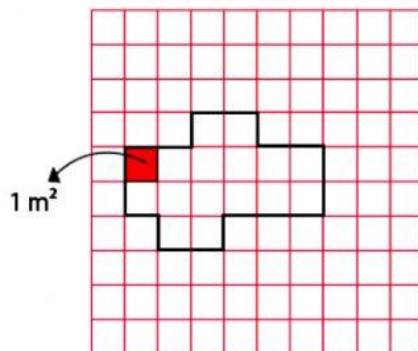

A = _____ cm^2

2)

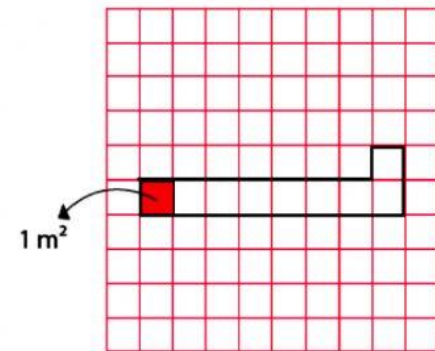

A = _____ m^2

3)

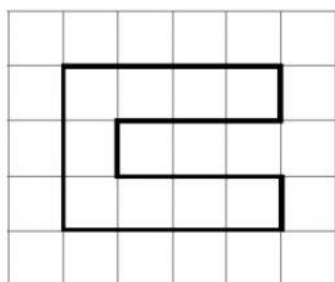

A = _____ m^2

4)

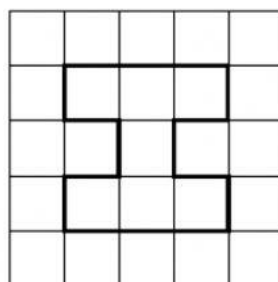

A = _____ cm^2

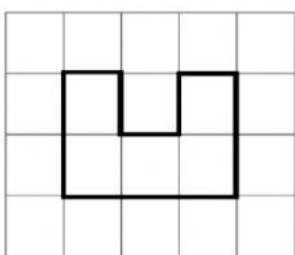

2. Encuentra el área de cada figura.

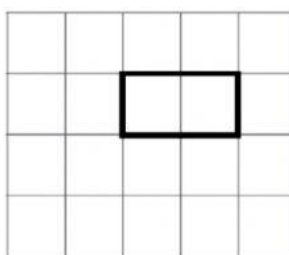

Si $\square = 1 \text{ m}^2$
 $A = \underline{\hspace{2cm}} \text{ m}^2$

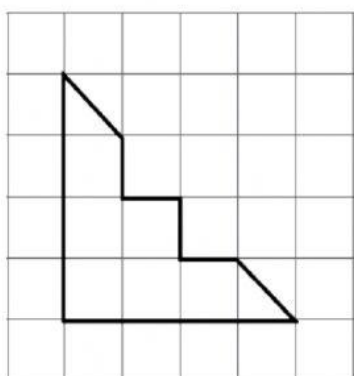

Si $\square = 1 \text{ cm}^2$
 $A = \underline{\hspace{2cm}} \text{ cm}^2$

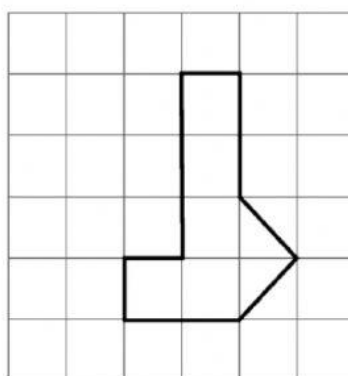

Si $\square = 1 \text{ cm}^2$ $A = \underline{\hspace{2cm}} \text{ cm}^2$

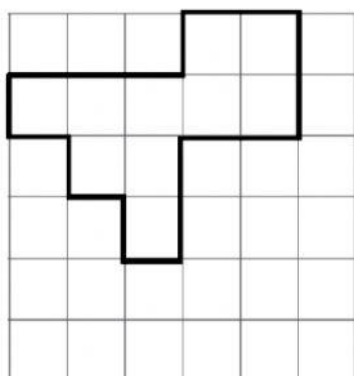

Si $\square = 1 \text{ cm}^2$ $A = \underline{\hspace{2cm}} \text{ cm}^2$

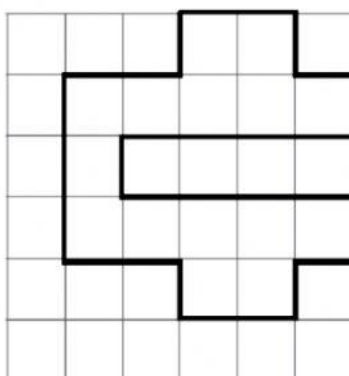

Si $\square = 1 \text{ m}^2$ $A = \underline{\hspace{2cm}} \text{ m}^2$

Si $\square = 1 \text{ cm}^2$ $A = \underline{\hspace{2cm}} \text{ cm}^2$

Si $\square = 1 \text{ m}^2$ $A = \underline{\hspace{2cm}} \text{ m}^2$

Si $\square = 1 \text{ cm}^2$ $A = \underline{\hspace{2cm}} \text{ cm}^2$
