

Adding with Whole Tens

1. The numbers are shown with ten-sticks and one-dots. Write the sums.

 a. $54 + 10 = \underline{\hspace{2cm}}$	 b. $\underline{\hspace{2cm}} + 20 = \underline{\hspace{2cm}}$
 c. $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$	 d. $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
 e. $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$	 f. $\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Adding whole tens and another 2-digit number

Break down the other number into tens and ones.
Add the tens. Then, add the ones.

$$\begin{array}{c}
 50 + 26 \\
 \swarrow \quad \searrow \\
 50 + 20 + 6 \\
 \swarrow \quad \searrow \\
 70 + 6 = 76
 \end{array}$$

$$\begin{array}{c}
 39 + 40 \\
 \swarrow \quad \searrow \\
 30 + 9 + 40 \\
 \swarrow \quad \searrow \\
 70 + 9 = 79
 \end{array}$$

2. Add. Break the second number into tens and ones first. Then add the tens.

a. $10 + 34 = \underline{\hspace{2cm}}$ ($10 + 30 + 4$)	b. $10 + 28 = \underline{\hspace{2cm}}$ ($10 + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$)	c. $20 + 24 = \underline{\hspace{2cm}}$ ($20 + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$)
d. $30 + 21 = \underline{\hspace{2cm}}$	e. $50 + 17 = \underline{\hspace{2cm}}$	f. $40 + 33 = \underline{\hspace{2cm}}$
g. $60 + 23 = \underline{\hspace{2cm}}$	h. $30 + 37 = \underline{\hspace{2cm}}$	i. $70 + 25 = \underline{\hspace{2cm}}$
