Extreme Weather

Cut and glue the normal weather conditions into the extreme weather categories. Then talk about weather.

Tornado	Blizzard
 <p>hot stormy windy</p>	<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; width: 80px; height: 80px;"></div> <div style="border: 1px solid black; width: 80px; height: 80px;"></div> <div style="border: 1px solid black; width: 80px; height: 80px;"></div> </div>
Hurricane	Flood
<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; width: 80px; height: 80px;"></div> <div style="border: 1px solid black; width: 80px; height: 80px;"></div> </div>	<p>very, very</p> <div style="border: 1px solid black; width: 80px; height: 80px; margin-left: auto;"></div>

cold

windy

windy

rainy

rainy

snowy

In a tornado, it's hot,
stormy, and windy.
