

**Clase 22, Guía Matemática: Unidad 4, lección 2**  
**Multiplicación, propiedad distributiva**

1. Resuelve las siguientes multiplicaciones usando la propiedad distributiva:

$$4 \cdot (6 + 2) = (4 \cdot 6) + (4 \cdot 2)$$

$$\boxed{\phantom{00}} \cdot \boxed{\phantom{000}} = \boxed{\phantom{000}} + \boxed{\phantom{000}}$$

$$\boxed{\phantom{000}} = \boxed{\phantom{000}}$$

$$5 \cdot (3 + 7) = (\phantom{00} \cdot \phantom{00}) + (\phantom{00} \cdot \phantom{00})$$

$$\boxed{\phantom{00}} \cdot \boxed{\phantom{000}} = \boxed{\phantom{000}} + \boxed{\phantom{000}}$$

$$\boxed{\phantom{000}} = \boxed{\phantom{000}}$$
