

# Photosynthesis and Parts of a Plants Quiz

\* Required

The process in which a plant uses sunlight to convert carbon dioxide and water into sugar? \*

- ☐ Chlorophyll
- ☐ Carbon Dioxide
- ☐ Photosynthesis
- ☐ Oxygen

How many basic plant parts are there? \*

- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4

Chlorophyll is a green chemical that helps a plant make food. It absorbs sunlight and aids the plant in making sugar. \*

- ☐ True
- ☐ Flase

A network of teeny little "straws" that pull water and nutrients up from the soil. \*

- ☐ Roots
- ☐ Flowers
- ☐ Stem
- ☐ Leaves

What is released by a plant after the process of photosynthesis? \*

- ☐ Carbon Dioxide
- ☐ Oxygen
- ☐ Water
- ☐ Nutrients

This part of a plant supports the plant upright and also carries moisture (water) and nutrients from the roots throughout the plant. \*

- ☐ Roots
- ☐ Flowers
- ☐ Stem
- ☐ Leaves

The process of photosynthesis includes the following elements: sunlight, carbon dioxide, water and nutrients, and oxygen. \*

☐ True

☐ False

Animals and people do not need oxygen to survive. \*

☐ True

☐ False

This colorful part of a plant that has the things needed for the plant to reproduce. \*

☐ Roots

☐ Flowers

☐ Stem

☐ Leaves

Plants and animals are important for the process of photosynthesis to take place. \*

☐ True

☐ False
