

FRACCIONES

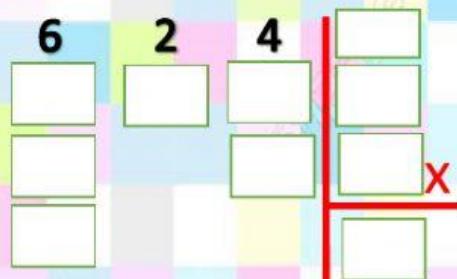

Profesora: L. Elena López Torrico

Año de escolaridad: 4º Grado

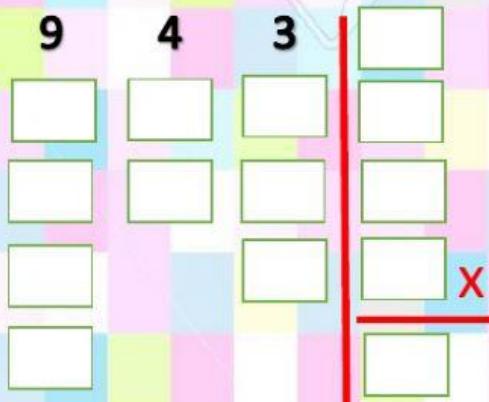

Nivel: Primario

Resuelve las siguientes operaciones

$$\text{E-1)} \quad \frac{5}{6} - \frac{1}{2} + \frac{3}{4} = \underline{\underline{\quad}} - \underline{\underline{\quad}} + \underline{\underline{\quad}} = \underline{\underline{\quad}}$$

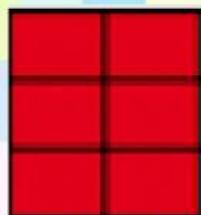

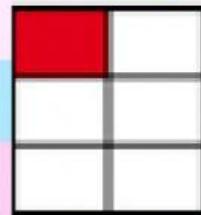

$$\text{E-2)} \quad \frac{7}{9} - \frac{3}{4} + \frac{2}{3} = \underline{\underline{\quad}} - \underline{\underline{\quad}} + \underline{\underline{\quad}} = \underline{\underline{\quad}}$$

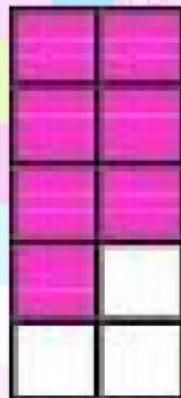

Resuelve los siguientes ejercicios (descompone los denominadores en una hoja auxiliar) y une con una línea el resultado con su gráfico.

$$\frac{5}{2} - \frac{7}{4} = \underline{\underline{\quad}} - \underline{\underline{\quad}} = \underline{\underline{\quad}}$$

$$\frac{1}{2} + \frac{4}{6} = \underline{\underline{\quad}} + \underline{\underline{\quad}} = \underline{\underline{\quad}}$$

$$\frac{5}{2} - \frac{9}{5} = \underline{\underline{\quad}} - \underline{\underline{\quad}} = \underline{\underline{\quad}}$$
