

Distribuciones gráficas

Practicamos

Observa cada uno de los siguientes gráficos. Luego
Identifica la operación y calcula el valor de "

Ejemplo

$$17 + 64 = 81$$

$$27 + 65 = 92$$

$$78 + 47 = 125$$
$$x = 125$$

1

$$66 \square 12 = \square$$

$$62 \square 24 = \square$$

$$47 \square 26 = \square$$
$$x = \square$$

2

$$80 \square 35 = \square$$

$$94 \square 27 = \square$$

$$72 \square 16 = \square$$
$$x = \square$$

3

$$10 \square 37 = \square$$

$$16 \square 23 = \square$$

$$38 \square 37 = \square$$
$$x = \square$$

4

$$22 \square 37 = \square$$

$$11 \square 17 = \square$$

$$19 \square 36 = \square$$
$$x = \square$$
