3) $1267 + 4809 = 4809 + \boxed{}$

4) $1099 + \boxed{} = 1100$

5)

Th	H	T	O
1		2	4
	1	7	
7	6	9	8

6) In the number 3985, what is the place value of 8. Choose the correct answer by clicking on it.

ONES

TENS

HUNDREDS

THOUSANDS

Fill the boxes with numbers in ascending order

7)

726, 234, 1098

Three green rectangular boxes are stacked vertically. The top box is the smallest, the middle box is medium-sized, and the bottom box is the largest. They are intended for the numbers 234, 726, and 1098 respectively.

8)

2316, 1356, 943

Three red rectangular boxes are stacked vertically. The top box is the smallest, the middle box is medium-sized, and the bottom box is the largest. They are intended for the numbers 943, 1356, and 2316 respectively.

Fill the boxes with numbers in descending order

9)

765, 134, 567

Three light blue rectangular boxes are stacked vertically. The top box is the largest, the middle box is medium-sized, and the bottom box is the smallest. They are intended for the numbers 765, 567, and 134 respectively.

10)

4134, 3674, 6764

Three light purple rectangular boxes are stacked vertically. The top box is the largest, the middle box is medium-sized, and the bottom box is the smallest. They are intended for the numbers 4134, 6764, and 3674 respectively.
