

2-DY-1 LONG DIVISION WITH REMAINDERS

PRACTICE ASSIGNMENT

Solve for the quotient of 47 and 2.

Solve for the quotient of 64 and 3.

$$\begin{array}{r} \square \square \text{ R } \square \\ 2 \overline{) 47} \end{array}$$

$$\begin{array}{r} \square \square \text{ R } \square \\ 3 \overline{) 64} \end{array}$$

Solve for the quotient of 89 and 5.

Solve for the quotient of 71 and 6.

$$\begin{array}{r} \square \square \text{ R } \square \\ 5 \overline{) 89} \end{array}$$

$$\begin{array}{r} \square \square \text{ R } \square \\ 6 \overline{) 71} \end{array}$$
