

Subject	Unit	Lessons	Type of Sheet
Mathematics	10	6	Class Work

Steps in Grid Method:

1. Partitioning
2. Place the numbers in grid
3. Multiply
4. Add both numbers.

a. 25×4

	20	5
×	4	
	80	20

80 + 20 = 100

Ch1. Partition the numbers in grids.

a. 18×4

×		

+ =

b. 24×5

×		

+ =

c. 17×8

×		

+ =

Ch2. Q1. Use grid method to work out these multiplications.

b. 36×5

$$\begin{array}{r} \times \\ \hline \end{array}$$

$\square + \square = \square$

CH2 Q2. First round the numbers and estimate, and then use the grid method to calculate.

a. 29×4 Estimate =

$$\begin{array}{r} \times \\ \hline \end{array}$$

$\square + \square = \square$
