New gardeners perfect are planted animals

Under Attack

Many animals spend most of their lives in the water. Some animals, like the blue whale, are the largest animals on Earth. Other animals, like the cheetah, are the fastest. Some animals are endangered, meaning they are at risk of becoming extinct. This is because their numbers are becoming smaller and smaller.

Glossary...

There are three types of communities. You might need to decide when you get older which type of community you would like to live in. These three types of communities are referred to as rural, suburban and urban and each of these is very different from the others.

Adapt - adjust to a condition or environment.
Survive - an animal that survives.
Climate - weather conditions of an area, including average temperature and rainfall.
Habitat - the area where an animal lives.
Endangered - an animal that is at risk of becoming extinct.
