**LEVEL-2**

Class: III

Medium : English

Subject : Mathematics

Name of the Chapter :

**NUMBERS**

Worksheet No. : 09

Topic/Concept :

**Comparing three-digit numbers.**

**I. Learning outcomes:**

1. Able to Compare any two given numbers up to 999 and determine which is greater, which is smaller and which are equal by using the  $>$ ,  $<$  and  $=$  symbols.
2. Able to write ascending and descending orders of given three digit numbers.

**II. Conceptual understanding/Activity/Model problems:**

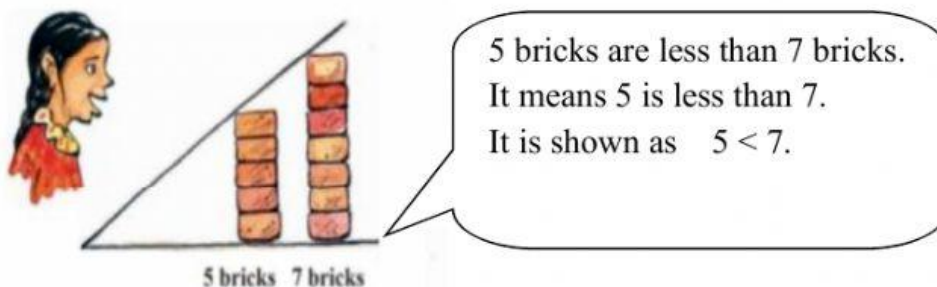

- Do you know how to compare numbers using symbols ?
- What symbols are used to compare numbers ?

Let us see and observe how to compare numbers using symbols.

**Hint :**

See the page number 27 in your textbook.

**1. How did Mayuri compare bricks ?**

7 bricks are more than 5 bricks.  
It means 7 is greater than 5.  
It is shown as  $7 > 5$ .

2 bricks are equal to 2 bricks  
It means 2 is equal to 2.  
It is shown as  $2 = 2$ .

## 2. Write the 2 digit numbers using 5, 7.

These are 57 and 75.

$57 = 5 \text{ tens} + 7 \text{ ones}$

$75 = 7 \text{ tens} + 5 \text{ ones}$

75 is greater than 57, hence  $57 < 75$

(or)

57 is less than 75, hence  $75 > 57$ .

## 3. Observe the 3 digit numbers 385 and 674.

$385 = 3 \text{ Hundreds} + 8 \text{ Tens} + 5 \text{ Ones}$

$674 = 6 \text{ Hundreds} + 7 \text{ Tens} + 4 \text{ Ones}$

385 has 3 hundreds whereas 674 has 6 hundreds.

So 674 is greater than 385. i.e.  $674 > 385$

(or)

385 is less than 674. i.e.  $385 < 674$ .

**4. Observe the following numbers.**

424, 713, 204, 826, 913

The ascending order of the above number is:

204, 424, 713, 826, 913

The descending order of the above number is:

913, 826, 713, 424, 204
