■ Tick in which life process happens.

Nutrition Relation Reproduction

☐ Living things get information through their senses.

☐ Living things eat food, which contains nutrients.

☐ Living things have offspring similar to their parents.

■ Match with the stages of life.

Our bodies and minds stop working so well.

● Gestation

During the first twelve or thirteen years of our life we grow from babies to children.

● Childhood

Your bodies are ready to have children.

● Adolescence

We are in our mother's womb.

● Adulthood

Between thirteen and twenty years old our body is transformed.

● Old stage

■ Name the different stages of life.
