Ucayali Wildlife Rescue Centre

Hi! My name is Ricardo and I am a veterinarian at the Ucayali Wildlife Rescue Centre. We rescue and take care of animals that were affected by trafficking in the region of Ucayali.

There are a lot of animals here. These are some of the most popular animals that we rescued.

These are the spider monkeys or *maquisapas*. They live in the Peruvian jungle. They have long arms and legs and a big tail. They can jump and they can climb trees to get fresh fruit.

These little ones here are the *Taricaya* turtles. They live in the Amazon river. They have a hard shell on their backs to protect themselves from predators. They can't run very fast, but they can swim quickly.

These are my personal favourites, the macaws. They live in the Peruvian rainforest. Macaws can fly and they have strong wings and colourful feathers. They can learn to repeat some words, but they can't have conversations like us.

All these animals are endangered. We have to take care of them or they will go extinct.
