

## PERÍMETRO

Recuerda!!!! El perímetro es la suma de todos los lados de una figura geométrica.

Ejemplo:

$$P = 6\text{cm} + 6\text{cm} + 6\text{cm} + 6\text{cm} = 24\text{cm}$$

I) Ahora, calcula el perímetro de las siguientes figuras:

a)

$$P = \boxed{\quad} \text{ cm.}$$

$$P = \boxed{\quad} \text{ cm.}$$

b)

c)

$$P = \boxed{\quad} \text{ cm.}$$

d)

$$P = \boxed{\quad} \text{ cm.}$$

II) Ahora une cada figura con el perímetro correcto:

1)

$$P = 26 \text{ cm}$$

2)

$$P = 16 \text{ cm}$$

3)

$$P = 22 \text{ cm}$$

4)

$$P = 18 \text{ cm}$$
