- A. The main entrance to the Kuskovo Palace is made in the form of a high six-column portico with the monogram PS incised on the central pediment. Two gently sloping sandstone ramps lead from the entrance and end with sphinx figures on their parapets. The Palace was intended solely for receptions and this accounts for its layout and decor.
- B. Legendary soccer team, FC Barcelona, pulled off one of the greatest sports comebacks of all-time in a game against rival Paris St. Germain. The problem for Barcelona was that they lost the first game 4-0. That meant that they'd have to win by 5 goals in the next game ... against a tough team, in a game where final scores are often more like 1-0.
- C. You probably haven't given much thought (or even known) about the garbage in space, floating just above Earth. But it's there. And there's a lot more of it than you'd think. Space junk is basically stuff left over from satellites and rocket launches, all man-made things. The problem in addition to there being a lot of it is that each piece travels at about 17,500 miles per hour!
- D. Spiders eat mostly insects. They're natural enemies for the most part. Without spiders the insect population would be out of control. And since insects eat plants and trees we have a lot to thank spiders for. "Spiders thus make an essential contribution to maintaining the ecological balance of nature," said Dr. Nyffeler. He's been studying spiders for 40 years!
- E. While many people are focusing on Mr. Macron's landslide win and characterizing Ms. Le Pen's defeat as a big one, others are pointing out that Ms. Le Pen's party, Front National, did the best it ever has and that there's growing support for her ideas. France has a population of 66 million people and in terms of land is a bit larger than the state of Texas.

Задание 19. (in class)

Imagine that you are preparing a project with your friend. You have found some interesting material or the presentation and you want to read this text to your friend.

You have 1.5 minutes to read the text silently, then be ready to read it out aloud.

You will not have more than 1.5 minutes to read it.

Charles Darwin was driven by gastronomic, as well as scientific, curiosity and once ate an oil. While reading Divinity at Cambridge University, he became a member of the Glutton club which met once a week and actively sought to eat animals not normally found on menus. Darwin's son commenting on his father's letters, noted that the Glutton club enjoyed, among other things, hawk and bittern.

Over the years, Darwin sharpened up considerably in the academic arena and lost his faith in God, but he never lost his taste for the allure of an interesting menu. In the Galapagos, Darwin wolfed down a few helpings of giant tortoise. Not realising the importance of giant tortoises to his later evolutionary theory, forty-eight specimens were loaded aboard the Beagle. Darwin and his shipmates proceeded to eat them, throwing the shells overboard as they finished.
