

Transition Elements

Draw a line to the place where each Bohr model belongs on the

The diagram shows a 2D grid with a path highlighted by thick black lines. The path starts at the top-left corner (row 1, column 1) and moves right to (1, 12), then down to (12, 12), then left to (12, 3), then up to (3, 3), then right to (3, 13), then down to (13, 13), then left to (13, 6), then up to (6, 6), then right to (6, 16), then down to (16, 16), then left to (16, 7), then up to (7, 7), then right to (7, 17), then down to (17, 17), then left to (17, 8), then up to (8, 8), and finally right to (8, 18). The grid is labeled with row numbers 1 through 18 on the left and column numbers 1 through 18 on the top. The word "drop" is written in green text at the following coordinates: (1, 2), (2, 2), (3, 3), (7, 7), and (8, 8). A callout box with two lines pointing to the grid is located at the bottom left.
