

## Sumamos y Restamos

Vamos a **sumar** y **restar** como en los videos: descomponiendo los números. Completá todos los pasos, (si no te acordás cómo se hace, mirá el ejemplo).

$$\begin{array}{rcl} 42 & + & 16 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ 40 & 2 & + & 10 & 6 \\ \swarrow \searrow & & \swarrow \searrow \\ 50 & + & 8 = 58 \end{array}$$

$$\begin{array}{rcl} 67 & - & 35 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ 60 & 7 & - & 30 & 5 \\ \swarrow \searrow & & \swarrow \searrow \\ 30 & + & 2 = 32 \end{array}$$

$$\begin{array}{rcl} 67 & + & 30 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ \square & \square & + & \square & \square \\ \swarrow \searrow & & \swarrow \searrow \\ \square & + & \square = \square \end{array}$$

$$\begin{array}{rcl} 88 & - & 47 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ \square & \square & - & \square & \square \\ \swarrow \searrow & & \swarrow \searrow \\ \square & + & \square = \square \end{array}$$

$$\begin{array}{rcl} 36 & + & 51 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ \square & \square & + & \square & \square \\ \swarrow \searrow & & \swarrow \searrow \\ \square & + & \square = \square \end{array}$$

$$\begin{array}{rcl} 79 & - & 55 = \\ \swarrow \downarrow & & \swarrow \downarrow \\ \square & \square & - & \square & \square \\ \swarrow \searrow & & \swarrow \searrow \\ \square & + & \square = \square \end{array}$$
