**Smoking should Be Banned In Public Area**

Have you ever come home with the stench of smoke clinging to your clothes? Or inhaled a cloud of smoke as a group of smokers passed, causing you to cough and choke? Neither experience is pleasant, and this is why smoking should be banned in public areas.

Many countries today have laws that prohibit smoking in public places. It is because smoking affects not only the person who smoke but also non smokers as well.

Secondhand smoke is the third leading cause of preventable death (after active smoking and alcohol), according to the Manitoba Medical Association. They also say that the smoke contains over 4,000 chemicals, 50 of which are known to be cancer-related.

Secondhand smoke has been linked to heart and respiratory disease; lung, breast, cervical, and nasal sinus cancers; strokes and miscarriages.

In children, dangers include sudden infant death syndrome, fetal growth impairment, bronchitis, pneumonia, asthma and middle-ear disease.

Smoking is a dangerous habit that not only affects the smoker, but those around him or her. Banning the smoking in public will keep non-smokers safer. People who smoke subject themselves to deadly diseases by choice. Why should non-smokers be forced to be around it?

**Multiple Choice**

**Answering the questions below by choosing the correct option a, b, c, or d based on the text given.**

1. What kind of text is it?

a. Descriptive text	b. Narrative text
c. Analytical exposition	d. Hortatory exposition

2. From the text above , “Many countries today have laws that prohibit smoking in public places. It is because smoking affects not only the person who smoke but also non smokers as well”.

The sentences is a part of .....

a. Thesis	b. Series of argument
c. reiteration	d. general knowledge

3. which one is the part of the thesis.?

- a. Neither experience is pleasant, and this is why smoking should be banned in public areas.
- b. Smoking is a dangerous habit that not only affects the smoker

- c. In children, dangers include sudden infant death syndrome
- d. Many countries today have laws that prohibit smoking in public places

4. How to make the second smokers safer in the environment (reiteration)?

- a. getting away from smokers
- b. don't smoke
- c. stop operating the company
- d. banning smoking in public places
