

Drag and drop the descriptors to compare coding and programming.

No previous
preparations; trials-
and-error

Simple solution
or small part of
a project

Basic knowledge of
programming
language, its syntax,
and keywords

	CODING	PROGRAMMING
Definition		
Tools		
Expertise		
Approach		
Outcome		

Full ready-to-use
application

Methodical
approach,
attention to
details

Experience in
creating algorithms,
modeling a problem,
data processing,
project management

A text editor
would suffice

The process of
development of a
fully functioning
software solution

Translation of natural
language into machine
commands through an
intermediary coding
language

Analysis tools,
modeling programs,
code generators,
testing frameworks
