Unit 2: Monkeys are amazing!

Review

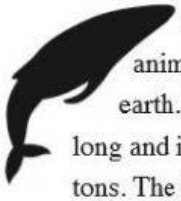

1. Read the text and write A, B or C.

READING COMPREHENSION

Cool Animals

There are many interesting animals on earth. Unfortunately, many of them are endangered species. Read about some of them.

Blue Whale

It is the largest animal on earth. It is 30 metres long and it weighs 100 tons. The blue whale eats four tons of shrimp every day! This animal can live about 110 years. The sound it makes is really cool. You can hear it 850 kilometres away.

Woolly Spider Monkey

This is a small monkey that is no taller than 50 centimetres. It lives in the rainforest. Fruits and nuts are part of its diet. The spider monkey has very special hands, but it can't climb with them. It uses its cool tail to do it. The spider monkey's tail is almost 90 centimetres long!

Tiger

It lives in Asia. A tiger usually has more than 100 stripes, or lines, and all of them are different! Rabbits, pigs, and fish are part of its diet. It can swim and climb trees. A cool fact is that baby tigers can't see when they are born, but they can see at night when they get older.

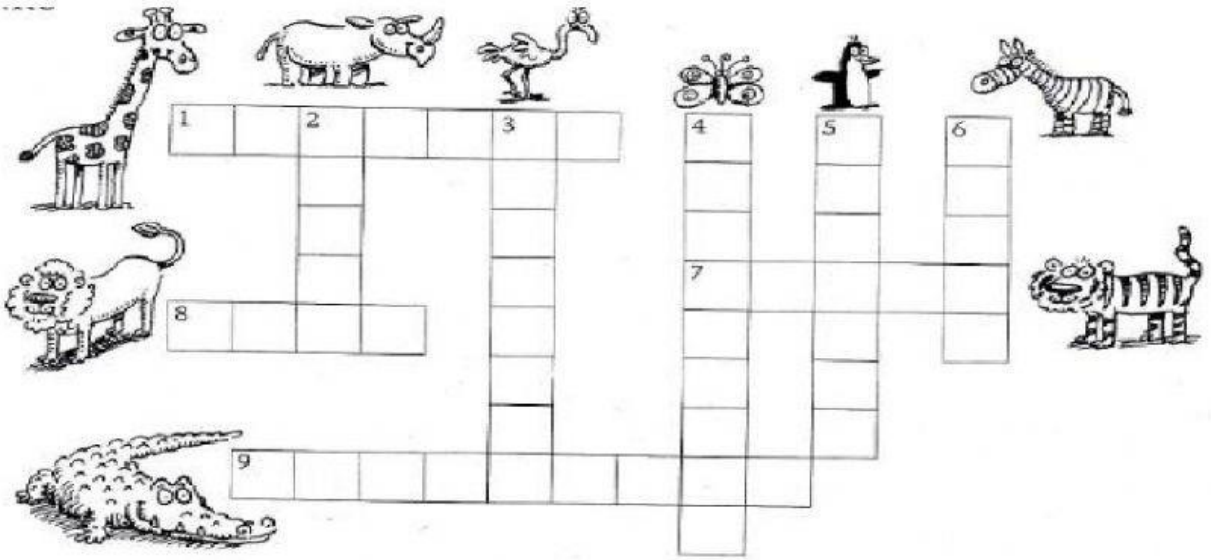

It is sad to see how many animals disappear every year. Let's do something about it!

Read and write *A, B,* or *C.*

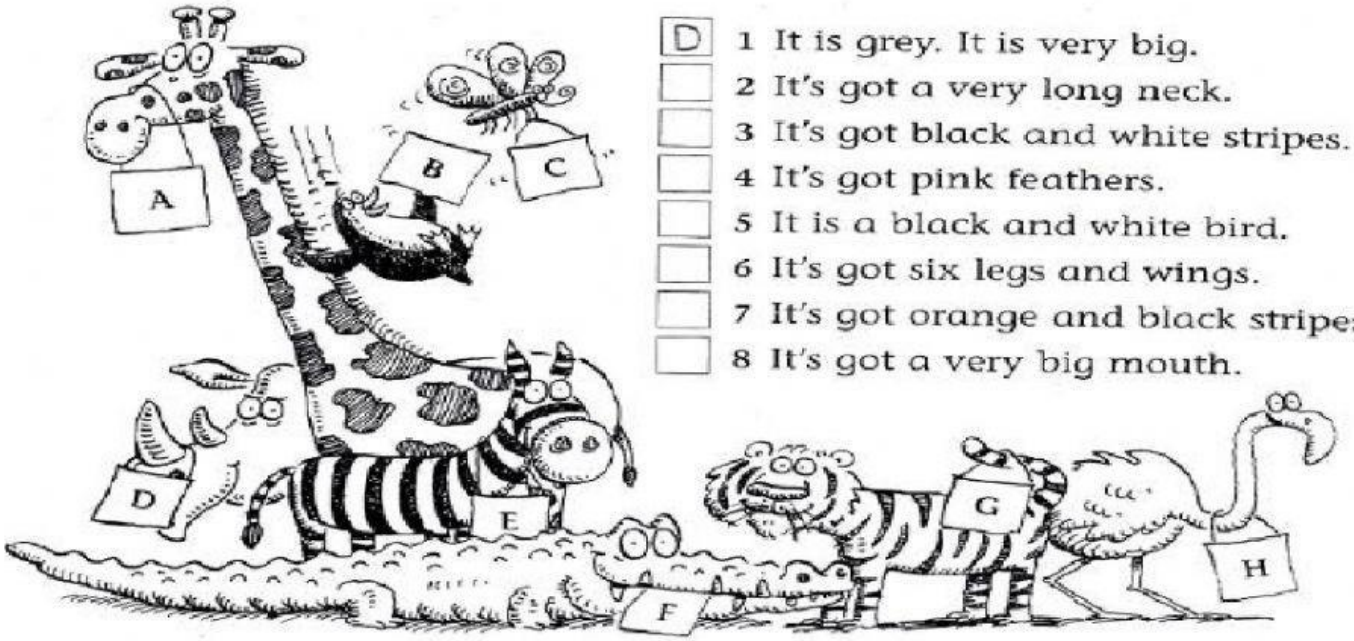

A. Blue Whale B. Spider Monkey C. Tiger

1. It eats shrimp. A
