

Ejercicios de Operaciones Combinadas

Nombre: _____ Grado: _____

Resuelve las siguientes operaciones combinadas.

a) $6 \times 3 - 8 : 4 - 4 \times 2 =$

$$\begin{array}{ccccccc} & \swarrow & & \searrow & & \swarrow & \\ \square & & 8 : 4 & & \square & & \\ & \swarrow & & \searrow & & \swarrow & \\ \square & & \square & & \square & = & \square \\ & \swarrow & & \searrow & & \swarrow & \\ \square & & \square & & \square & = & \square \end{array}$$

b) $(8 - 4) : 2 - (12 - 9) : 3 =$

$$\begin{array}{ccccccc} & \swarrow & & \searrow & & \swarrow & \\ \square & & : 2 & - & \square & : 3 & \\ & \swarrow & & \searrow & & \swarrow & \\ \square & - & \square & = & \square \end{array}$$

c) $14 - 24 : 3 + 6 : 2 =$

$$\begin{array}{ccccccc} & & \swarrow & & \swarrow & & \\ 14 - & \square & + & \square & & & \\ & \swarrow & & \swarrow & & \swarrow & \\ \square & + & \square & = & \square \end{array}$$

d) $(27 : 9) - 3 + 2 + (2 \times 2) =$

$$\begin{array}{c} \vee \\ \square \end{array} - 3 + 2 + \begin{array}{c} \vee \\ \square \end{array}$$

$$\begin{array}{c} \square - 3 \\ \vee \end{array} + 2 + \begin{array}{c} \square \\ \vee \end{array} = \square$$

$$\square + \square = \square$$

e) $3 \times (4 \times 2 - 3) - (4 + 6 : 3) =$

$$3 \times \left(\begin{array}{c} \vee \\ \square - 3 \end{array} \right) - \left(4 + \begin{array}{c} \vee \\ \square : 3 \end{array} \right)$$

$$3 \times \begin{array}{c} \vee \\ \square \end{array} - \begin{array}{c} \vee \\ \square \end{array}$$

$$\begin{array}{c} \vee \\ \square \end{array} - \square = \square$$
