Reading

Reading techniques

Reading techniques include: scanning, skimming, intensive and **extensive reading.**

+ **Scanning**: You try to find a particular piece of information. You read from top to down of the text quickly to find the specific information you need to answer questions.

+ **Skimming**: You try to gather the most important information as quickly as possible. You read from top to down of the text quickly and note important information.

+ **Intensive reading**: You try to find the details of a specific information. Example question: What does "intensive" in line 5 mean?

+ **Extensive reading**: You try to find general information of a passage. Example question: What is the best title for this passage?

Reading (1)

For many year people believe that the cleverest animal after man were chimpanzees. Ow, however, there is proof that dolphins may be even clearer than these big apes.

Although a dolphin lives in the sea, it's not a fish. It is a mammal. It is in many ways, therefore, like a human being.

Dolphins have a simple language. They are able to talk to dolphins. But this will not be easy because dolphins cannot hear the kind of sounds make a third language which both he and the dolphins can understand.

Dolphins are also very friendly toward man. They often follow ships. There are many stories of dolphins guiding ships through difficult time and dangerous waters.
