

## RETO DE FRACCIONES

I. Lee, piensa y resuelve en forma correcta.

1. Resta fracciones. Expresa la respuesta en su forma más simple

$$\frac{7}{12} - \frac{1}{6} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} - \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

X 2

$$\frac{1}{2} - \frac{3}{10} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} - \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}} = \frac{\boxed{\phantom{00}}}{\boxed{\phantom{00}}}$$

X 5
