

- 3 How does a biome affect the plants and the animals that live there? Write a cause and effect of the biomes in the chart. There is one example.

	Cause	Effect
Tundra	Only the top layer of ground thaws in the summer.	No trees can grow in the tundra.
Desert		
Grassland		

There's very little water.	Grass grows very tall.
There's a lot of moisture.	The cactus stores water in the folds of its trunk.
