Write the degree and leading coefficient of $8x^6 + 9x^4 - 6x^3 + x - 5$.

Enter your answers in the spaces provided.

The degree is [   ].

The leading coefficient is [   ].

What is the degree and leading coefficient of this polynomial function?

$f(x) = 7x^3 + x^2 + 6x + 4$

Drag and drop your answers to correctly complete the sentences.

The degree is [   ].

The leading coefficient is [   ].

Identify the degree and leading coefficient of this polynomial function.

$f(x) = -9x^4 + 6x^3 - 2x^2 + 8x - 6$

Drag and drop your answers to correctly complete the sentences.

The degree is [   ].

The leading coefficient is [   ].
