

Think

1. Do you think freshness dating is a good thing? Why or why not?

2. What should you *not* do if the date on the item has past?

Here's another tip. Where will you find the fresher items on the store shelf? As the fresher items are put on sale, they are put *in back of* the older items.

Think

1. Give an example of how our health may depend on our being a wise buyer.

2. How do you think freshness dating helps the shopper?

Time Out

1. A store owner has two cartons of eggs for sale. One is dated 4/24. The other is dated 4/30. Which carton will be put on top?

Why?

2. What do *pull date*, *sell by*, *purchase by*, and *good until* tell the shopper?

3. If today were October 12 and the milk freshness date was 10-14, would the milk be fresh if you bought it today?
