

The Life Cycle of a Plant.

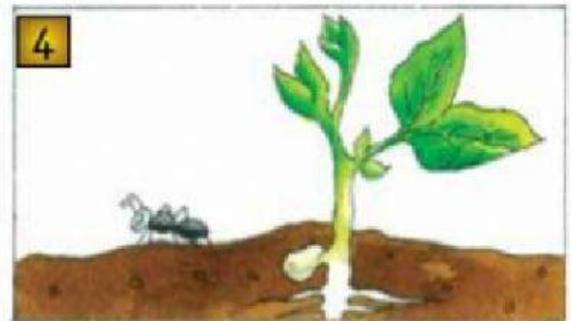

1 The seed is in the ground.

2 The seed grows a white root. The root grows down into the ground for food and water.

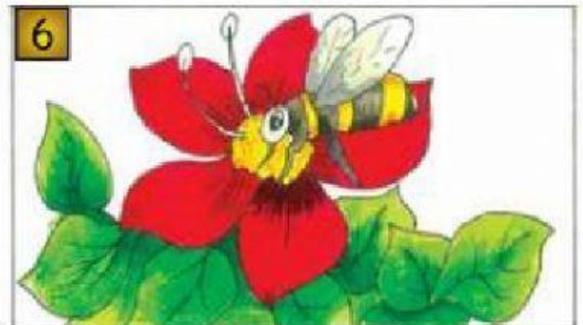

3 The seed grows a shoot. The shoot gets bigger. It grows up to the sunlight.

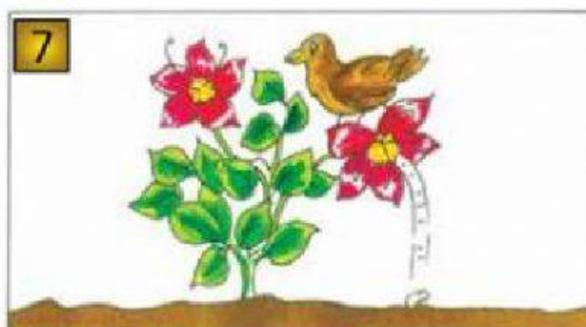

4 Leaves grow from the shoot.

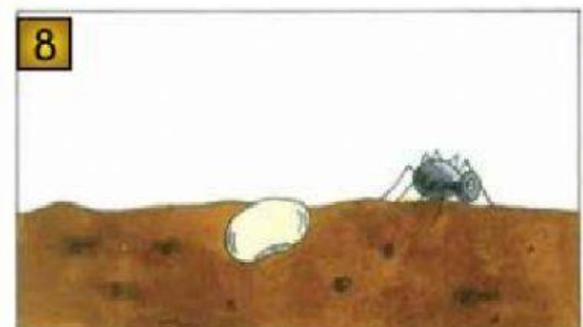

5 The seed grows into plant.

6 The plant grows flowers.

7 The flowers grow seeds.

8 The seed is in the ground.
