

RENEWABLE ENERGY SOURCES

Watch each of the videos below, then answer the questions below.

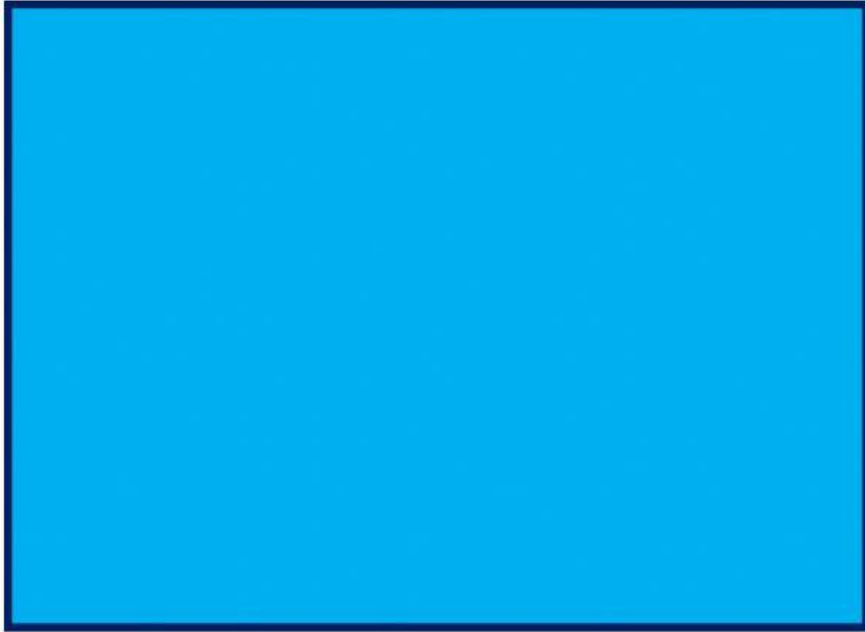

HYDROPOWER

SOLAR POWER

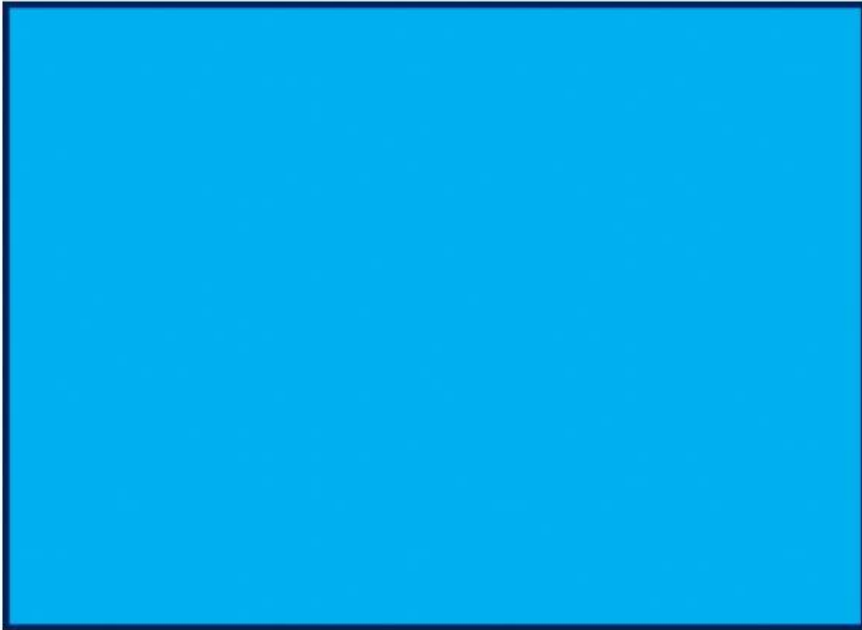

WIND POWER

BIOMASS POWER

GEO THERMAL POWER

TIDAL POWER

Use the word bank below to answer the following questions...

Hydropower

Solar

Wind

Biomass

Geothermal

Tidal

- 1) _____ energy uses the sun to create electricity.
- 2) _____ energy is energy used from organic matter (living or recently living plants).
- 3) _____ energy made from the internal heat of the earth.
- 4) _____ energy the electricity created from moving air which turns a turbine.
- 5) _____ energy is created by using moving water to turn a turbine.
- 6) _____ energy uses the natural rise and fall of tides to create electricity.
