

Science HW Week of 11/12/20

* Required

1. Which weather term best describes the words below? *

Rain, Snow, Sleet

Mark only one oval.

- Barometric Pressure
- Atmosphere
- Humidity
- Precipitation

2. Identify which set of meteorological tools and weather measurements is incorrect. *

Mark only one oval.

- Anemometer - wind speed
- Rain gauge - precipitation
- Barometer - air pressure
- Barometer - temperature

3. Identify which set of meteorological tools and weather measurements is correct. *

Mark only one oval.

- Anemometer-wind speed
- Rain gauge-air pressure
- Barometer-precipitation
- Thermometer-wind speed

4. Temperature is the measure of the amount of heat energy in the atmosphere. *

Mark only one oval.

- True
- False

5. How do meteorologists predict the weather? *

Mark only one oval.

- They look out a window.
- They ask another meteorologists.
- They track weather over a period of time (usually years).
- They only use weather instruments.
