Questions 11-14

Complete the summary using the correct word.

It seems that humans are not the only species that babble.

Before young infants speak, some experts think that they produce the **11**..... mixture of human sounds.

Over time, however, they copy the language of their parents, and this affects their ability to pronounce **12**..... sounds from other languages.

A **13** pattern has been found among dolphins.

They produce a range of individual sounds when they are babies, and then combine some of these to produce the sounds of **14**..... dolphins later on.
