

OPERACIONES COMBINADAS

Lee la siguiente situación y resuelve la operación:

El día domingo compramos 8 helados para la familia, en el camino 4 se derritieron. Por ello, mi mamá salió a comprar 9 helados más ¿Con cuántos helados nos quedamos al final?

A resolver:

a) $9 + 4 - 2$

A diagram illustrating the steps to solve the expression $9 + 4 - 2$. It shows a sequence of boxes connected by arrows and brackets. The first row has three boxes. A bracket under the first two boxes points down to a single box. An arrow points down from the third box to a single box. A bracket under these two boxes points down to a final box.

$10 - 5 + 6$

A diagram illustrating the steps to solve the expression $10 - 5 + 6$. It shows a sequence of boxes connected by arrows and brackets. The first row has three boxes. A bracket under the first two boxes points down to a single box. An arrow points down from the third box to a single box. A bracket under these two boxes points down to a final box.
