

A

Number the paragraphs 1-4 in the correct order.

Elvis acted in 33 movies, sold over one billion albums and won four Grammy awards. His talent and charisma captivated audiences around the globe, but he wasn't a happy man. Elvis was addicted to food and ate around 100,000 calories per day! Elvis died at the young age of 42 at his Memphis home, Graceland, on August 16, 1977, after years of drug abuse and a terrible diet.

Elvis Presley was born in Tupelo, Mississippi, on January 8, 1935. His family moved to Tennessee in 1948, and Elvis finished high school there in 1953.

He was a celebrity, but that didn't stop him from joining the military in 1958. Elvis went to Germany for 18 months with the army, and there he met Priscilla in 1959. She moved to the United States to be with him, but they only got married in 1967. Their marriage didn't last very long: they got divorced in 1972, when their daughter, Lisa Marie, was only 4 years old.

He started singing in Memphis in 1954. By 1956, he was an international success. His style was a combination of many musical influences, and his dance moves shocked parents and attracted young people all over the world.

B

Do you know much about the "King of Rock 'n' Roll"? Select the correct option.
