SOCIAL SCIENCE. UNIT 1.

THE UNIVERSE

1. Match the Word with its definition:

Stars sun nebulae galaxies planets dwarf planets satellites comets asteroids

.....are made of hot gas. They produce their own light and energy. The Sun is one of them.

.....are clouds of dust and gas.

.....are groups of stars and planets.

....are bodies that orbit stars. The Earth is one of them. They do not produce light.

.....are too small to be planets, but too big to be other bodies.

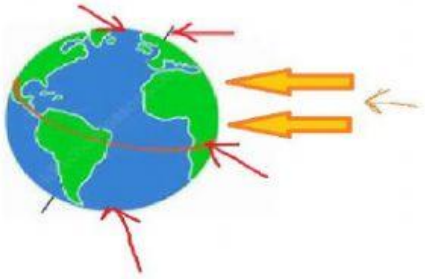

.....orbit other bodies.

....are large balls of ice and rock.

....are rocky objets that orbit the Sun.

2. Write the planets of the Solar System in orden, from the nearest to the Sun, to the furthest to the Sun.

3. Label the picture:

Axis

South Pole

North Pole

Equator

Sun's rays

Direction of Earth's rotation

4. Nombra y describe las capas de la atmósfera.

5. Completa el esquema:

1 Copia y completa en tu cuaderno.
