A. have B. give C. receive D. play
10. Her birthday is _____ Saturday, October 20th.
A. on B. at C. in D. of

Part 4
Reading

Read the passage and decide whether the following statements are True (T) or False (F).

Recycling is important in our lives because the waste we create is increasing all the time. The rise in population levels means that there are more people on the planet to create waste. The packaging is being developed, but many of these products contain materials that are not eco- friendly. New lifestyle changes, such as eating fast food, means that we create additional waste that isn't

recyclable. Recycling helps to decrease the pollution caused by waste. It reduces the need for raw materials so that the rainforests can be preserved. Huge amounts of energy are used when making products from raw materials. Recycling requires less energy which helps to preserve natural resources. We must remember that products made from raw materials are expensive.

- | | |
|--|-----|
| 1. Recycling is important in our lives. | T F |
| 2. More people create less rubbish. | T F |
| 3. Fast food creates more recyclable waste. | T F |
| 4. Recycling helps to reduce pollution. | T F |
| 5. Recycling requires more energy. | T F |
| 6. Products made from raw materials are cheap. | T F |

Part 5
Writing

Rearrange the following words to make complete sentences.
