HOW THE WORLD WORKS: PHOTOSYNTHESIS

1. DROP THE WORDS INTO THE CORRECT PLACE.

SUNLIGHT

WATER

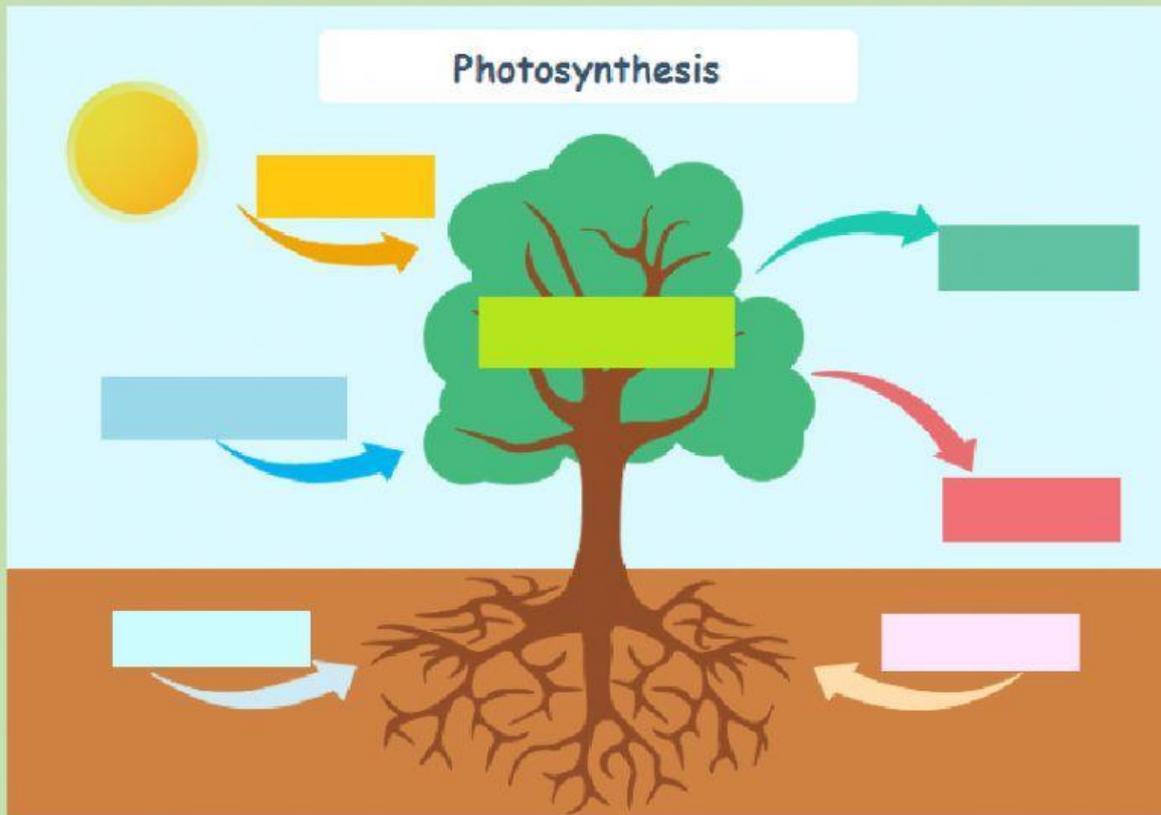

OXYGEN

CARBON DIOXIDE

NUTRIENTS

CHLOROPHYLL

SUGAR

2. READ THE SENTENCES. ARE THEY TRUE OR FALSE?

Chlorophyll is the green substance in charge of the process.

Roots absorb sunlight and take it to the leaves.

Carbon Dioxide comes from the water in the environment.

The nutrients travel through the stem and reach the leaves.

The results of the process are oxygen and sugar.
