

Name : _____

Class : 4 UNIVERSE

Topic : AREA OF SHAPES

 Length X Width = $6 \text{ cm} \times 6 \text{ cm} = 36 \text{ cm}^2$	 Length X Width = $5 \text{ cm} \times 3 \text{ cm} = 15 \text{ cm}^2$	 (Length X Width) $\div$ 2 = $(10 \text{ cm} \times 4 \text{ cm}) \div 2 = 20 \text{ cm}^2$
---	---	---

Find the area.

length X width =
cm X cm = cm^2

length X width =
cm X cm = cm^2

length X width =
cm X cm = cm^2

(length X width) $\div$ 2 =
(cm X cm) $\div$ 2 = cm^2
