

The US Population – A Multicultural Society?

146 147

Indicator Census 2010/ *2000	Census Area			Units
	112.02	168	116	
Population density	5,356	27,317	18,230	inh./sqkm
Whites	80.5	17.4	70.5	per cent
Hispanics	6.6	48.1	8.8	per cent
Blacks	0.7	27.6	4.2	per cent
Asians	10.2	4.4	13.8	per cent
Others	2.0	2.5	2.7	per cent
Household income <10 000 \$*	12.2	28.5	7.1	per cent
Adults with < 9 years education*	0,0	21.7	1.8	per cent
Average household income*	546,409	77,105	68,022	\$/year

M1 Comparison of three census areas in East Manhattan
(Source: www.census.gov)

- Turn the figures marked yellow into three pie charts. Afterwards, write a short text about the ethnic segregation in East Manhattan.
- With the help of the table and the map **M2**, complete the text below. Some of the expressions can be found in the following list.

List: low, ethnic, highest, average household income, all adults have an education longer than nine years, Hispanic, high, quarter.

When we compare the three census areas, not only _____ segregation becomes visible.

You can see that the areas with the _____ population density have the lowest average household income. In the census area _____ at the south-eastern tip of Central Park the conditions are much better: The population density is _____ and the average household income is very _____. The people there seem to be well-educated because _____. You can see if people are well off, when the _____ is high and there are only few households with an income of _____.

The census area with the highest percentage of poor people is _____. It lies _____.

There, more than a quarter of the households earned less than _____ per year in 2000. Nearly half of its population has a _____ origin and a _____ of them are Blacks. The education standards are quite _____, as more than a fifth of the adults here went _____ to school.
