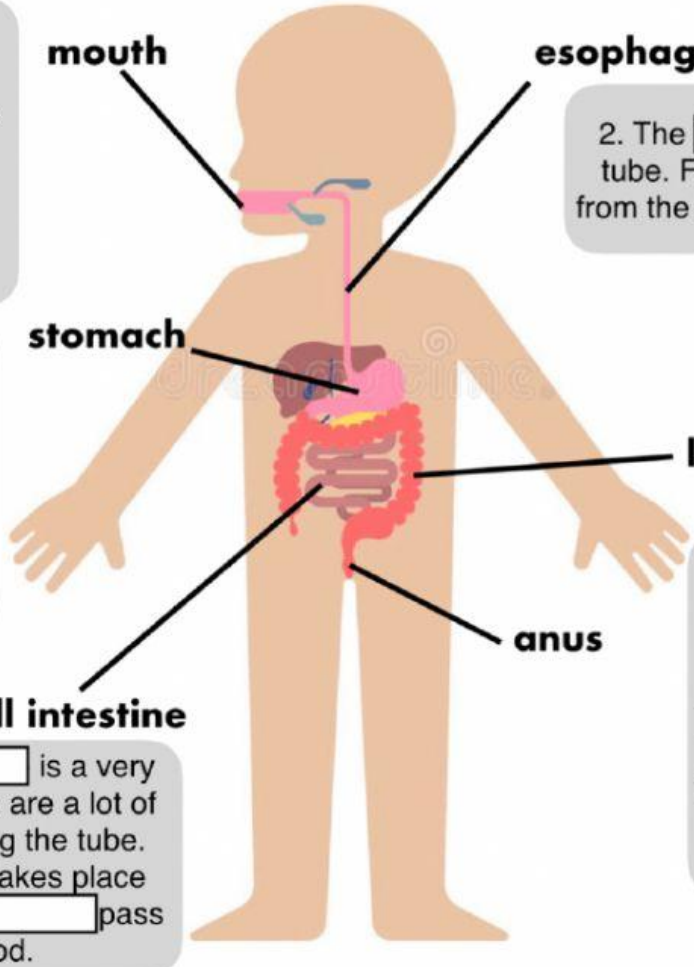
Digestive System 3º CHG

1. Complete with the following words:

juices tongue mouth esophagus large intestine small intestine

stomach Gastric teeth anus nutrients blood vessels saliva

1. The [ ] has [ ] that break the food into small pieces and a [ ] that mixes the food with [ ] to make swallowing easier.



2. The [ ] is a long tube. Food goes down here from the mouth to the stomach.

3. The [ ] is like a bag. [ ] [ ] turn food into a thick liquid. After about 3 hours this thick liquid goes into the small intestine.

4. The [ ] is a very long thin tube. There are a lot of [ ] along the tube. The "real" nutrition takes place here because the [ ] pass into the blood.

5. The [ ] is a wide tube. It connects to the [ ] What our body doesn't need goes out through the anus when we go to the loo.
