

A diagram illustrating a computer system and its various peripherals. The central components include a desktop monitor, a system unit (tower), a keyboard, and a mouse. Surrounding these are several other devices: a scanner, a printer, a digital camera, a microphone, and a webcam. Colored arrows (red, green, blue, black) point from each device to a corresponding empty rectangular box, likely intended for labeling the components. The boxes are arranged around the diagram, with some overlapping the edges of the image.
